MD **ASHIQ**UR **RAHMAN**

PHD STUDENT ~ THE UNIVERSITY OF ARIZONA

marahman@email.arizona.edu
ashiqopu117   ashiqopu
ashiqrahman.com

Tempe, Arizona   +1 (480) 310-7429

Skills

Research	Computer Networks, Named Data Networking, routing in mobile ad-hoc networks, scheduling algorithms with network coding in RSU-based vehicular ad-hoc networks (V2I).
Coding and Tools	C/C++ (preferred), familiar with Scala, Java and Python, ViM, GDB, Lucene, Docker.
Others	Natural language processing, Database systems, Information retrieval.

Experience

● ***Graduate Assistant***
Computer Science, The University of Arizona, AZ   *2016-Present*

Research: Architectural differences between Named Data Networking (NDN) and IP in mobile ad-hoc networks (submitted). Routing in challenging networks.

Teaching: CSC 425: Computer Networks (grader and project maintainer), Spring-17, Fall-17. CSC 452: Operating Systems (grader).

● ***Instructor***
Computer Science and Engineering, Daffodil International University, Bangladesh   *2015-2016*

Teaching (in-person): CS 113: Intro to Programming, CS 134 Data Structures, CS 221: Algorithms.

Mentor, Contest organizer and Judge: Competitive programming: Beginner and Intermediate.

● ***Workshop Manager and Trainer***
Special Group of Interest in Programming Contest (SGIPC), KUET, Bangladesh   *2012-2015*

Education

● ***Graduate (PhD):*** *Computer Science, The University of Arizona, AZ (GPA: 3.75/4.00)*   *2016-Present*

- **Student Developer**: NDN Forwarding Daemon (NFD): (https://named-data.net/doc/NFD/current/).
- Built a weighted probability dropout-based system to supports multi-level token annotation in medical literature in NLP. Near SoTA performance with significant lower training time. ***Tools: Python, Tensorflow, Docker***.
- Implemented heapfile manager, buffer manager, B+ tree of a MINIBASE database system. ***Tool: C.***
- Built an end-to-end Information retrieval system that indexes a large Wikipedia corpus to retrieve top relevant pages for short queries similar to Jeopardy game. Built a spam classifier. ***Tools: Scala, Lucene, Apache Maven***.
- Implemented a software IP router with ARP and PWOSPF routing protocol supporting link failures. ***Tool: C.***
Relevant Coursework: Algorithms in NLP; Database Systems and Implementation; Text Retrieval & Web Search; Operating Systems; Algorithms in Bioinformatics; Computer Networks; Computer Graphics; Computer Security.

● ***Undergraduate (BSc):*** *Computer Science and Engineering, Khulna University of Engineering & Technology (KUET), Bangladesh (GPA: 3.60/4.00)*   *2011-2015*

- **Thesis**: Application of network coding in scheduling algorithms in multi-RSU vehicular ad-hoc networks. *Published six papers* from related studies, two as the first author, two as second and two as third. ***Tool: CSIM.***
- **Software Development**: Implemented a gas station automation software, ***Tools: C#, .NET, Crystal Reports.***
- **Programming**: Participated in four ACM ICPC regionals, IUT-ICT Fest (best- 14th). Winner- Water Hackathon.
Relevant Coursework: Computer Networks, Data Communication, Machine Learning, Data Mining, Artificial Intelligence, Fault-tolerant systems, Data Structures and Algorithms, Algorithms, Discrete Mathematics, Mathematical Analysis, Digital System Design, Theory of Computation, Operating Systems, Software Engineering.
